NORTH AMERICA'S HISTORIC BUILDINGS

by Neal Bullington

The Santa Barbara Mission

Located at 2201 Laguna St. in Santa Barbara, California, the mission dates back to 1820. The complex features a stone, 2-story, L-shaped church with gabled roof sections. There are a pair of square fronted corner bell towers with arched openings, dome, and small

cupola facing a center pediment with niche for statuary. The large round-arched entrance is flanked by three Ionic columns on each side. The structure was partially destroyed by an earthquake and rebuilt in 1927. The facade and towers were demolished and

restored between 1950 and 1953. This is the fourth church to be located on this site and is the state's only mission not secularized in the Mexican decree of 1833. Ownership is private. ■■

Front Cover:

The head of a red ant as seen through a Scanning Electron Microscope in a stereo pair produced by Norman B. Patterson. Magnified 50 times in the actual view, this is one of several such images to be seen "Through the Electron Window"—the feature by Mr. Patterson in this issue.
