# 3D Assignment

## A Hyper Tale of Two Cities

*"Downtown Chicago" by Alan Wagner of Streamwood, IL was taken from a Cessna 172 with a Pentax K-1000. The bright, low angle sunlight of late November, 1987 provides dramatic contrast against the overcast background. The nearest tall building (bottom center) is a deep red-orange in the original color print pair.*

While we wait for responses to the "Wheels" assignment to arrive, here are the final entries selected in the "Hyper"

assignment.

*(Continued  
on page 38)*

*"New York City looking north from the World Trade Center" by John A. Lanzaro of Brooklyn, NY. This hyper aimed at the heart of the city has a base of about 40 feet and was taken in July of 1987.*
