ASSIGNMENT 3-D

An Invitation to Share
Your Best Stereo Images
with the World!

Now Show Us "One of Your Favorites"

Presented here are images selected from last fall's "Old" Assignment, delayed due to a lack of space in Vol. 24 No. 3. That Assignment drew a smaller response than any other so far, and in an effort to pry more stereos out of our members the next Assignment is about as open as it could

"North Olympic Peninsula, WA" by David Wilhelms of Aberdeen, WA was taken with two Yashika Mat-124's, and the bright green moss nearly glows in the original color prints. "Water and rock both bring images of age to me, and the long exposure gives that effect quite nicely to the stream, I believe."

be. We're asking you to send in "One of Your Favorites" from among all the stereo images you've ever photographed, drawn or otherwise generated. That's the extent

of the category. It simply needs to be an image you find special somehow—something you'd like to share with other members even if you can't easily explain why.

We avoided asking to see people's "favorite" or "best" stereos in the hope that members would be more willing to send in an image from among several "favorites" than to mail off that one, treasured, best of the best. (Although we've never lost a stereograph in transit.) And yes, feel free to send in up to six stereos for us to do the selection from some of "Your Favorites."

The Rules:

As space allows (and depending on the response) judges will select for publication

(Continued on page 34)

Wanted: Stereoscopic Research Grant Proposals

The NSA has decided to actively apply for external grants to support research into stereoscopy. Sample proposals are needed to strengthen NSA's applications by illustrating the high quality of research that could be completed if sufficient funds were available.

NSA members interested in potential research grants are asked to contact Paula Fleming for details at 7809 Heritage Drive, Annandale, VA. 22003 or by e-mail: fleming.paula@nsmnh.si.edu. Anyone having information about potential granting organizations should also contact her. ☐☐
