Three More Stereo Print Pair Labs

In addition to the lab mentioned in our previous Loose Chips (Leo's Camera in Klamath Falls, OR), we have learned of three other labs offering similar services. *Stereo World* has not tested any of these labs, and no endorsement of their work is intended here.

FOUR STAR PHOTO in Fort Benning GA, is making prints from Realist format (5p) negatives, offering 4 x 4 prints for 65 cents each or \$1.30 for a pair. This price includes processing the film and the return postage. Contact Richard Maeher at Four Star Photo of Georgia, Main Post Mini Mall Exchange, Fort Benning, GA 31905, rcmaeher@aol.com.

HOOPER CAMERA in Los Angeles offers prints from Realist format negatives at \$2.98 for processing plus 39 cents a frame for prints (or 78 cents a pair) plus shipping. For details on ordering this service, contact Hooper Camera, 5059 Lankershim, North Hollywood, CA 91601. (Thanks to Ray Zone for this one. It is reported that not all counterhands are familiar with the special service, but the long-time processing machine operator there is. Ray says he includes a sample mounted pair when he takes his film in.)

DAN'S CAMERA CITY in Allentown, PA, through Thom Gillam, offers stereo print pairs from Realist negatives, enlarged to 3-1/2" wide x 3-3/4" high, with each exposure set manually and matched with the corresponding negative to produce matched pairs. Developing is \$2.91 per roll. Film is returned uncut, rolled and sleeved. Shipping is \$2.00 per order. Each print from this premium service is \$1.00, or \$2.00 per pair and reprints from cut film are \$4.00 per pair. While payment is made to Dan's, all film is sent directly to Thom Gillam, who will inspect the prints for matched density and overall quality. He will deal with the lab regarding any quality control questions before sending prints to the customer. Contact Thom at thomgillam@netcarrier.com or send your film and check to Thom Gillam, 113 Seven Corner Road, Perkasio, PA 18944

Our thanks to Quentin Burke of Q-VU Mounts for compiling the above.

3-D Halloween Mag

Mary Beth's HALLOWEEN Spooktacular is a special activity magazine for kids. The cover states "Free! 16-page section in 3-D! Glasses included". The 192 page magazine retails for \$9.95 (it's nice to know that 16 of those pages are free!). It should be available at many book stores, newsstands and supermarkets, and is published by H&S Media, 2121 Waukegan Ave. Suite 120, Bannockburn, IL 60015 (847) 444-4880.

Bill Walton - PSA Associate

NSA Board of Directors Chairman Bill C. Walton was named an Associate of the Photographic Society of America at the group's 2000 convention in Albuquerque, NM Sept. 9. The honor is awarded to highly skilled photographers who actively participate in PSA's volunteer education and Society services and for recognition acquired through international exhibitions.

Bill was also honored for his outstanding contributions as Director of PSA's Stereo Card Circuit, for his many stereo card articles in the *PSA Journal*, his contributions to the NSA, and for his enthusiasm in encouraging stereo newcomers to enter PSA Salons.

Two Large Format 3-D Films to Watch for

CYBERWORLD is said to be a compilation of award-winning, stereoscopic computer animation films featuring some famous characters in a labyrinth of computer animation work.

Gulliver's Travels is in production as a large format 3-D animation feature by Mainframe Entertainment Inc., a large computer animation studio previously involved with animated cartoons on TV. Their most recent production was a direct-to-video feature for Harvey Entertainment based on the long-standing Casper the Friendly Ghost™ franchise.

David Hutchison Memorial, Central Park, NY

On Saturday Nov. 4, 2000 at 11am an informal occasion is planned to give family, friends and admirers an opportunity to remember David in a place he loved. The gathering will be at Summit Rock, near 83rd St. and Central Park West. Summit Rock is accessible via a footpath running south from the Mariner's Gate Playground near the West 85th St. entrance. ☺☺
