3 Months of 3-D in 2001

Stereo related subjects are featured for three of the twelve months in a 2001 calendar offered by George Eastman House. Titled *The Photographer's Tools—Cameras From the George Eastman House*, the calendar presents an illuminating journey into the photograph and motion picture technology collection of the institution's International Museum of Photography in Rochester, NY. Each month is devoted to a different aspect of photography and camera technology. One month titled "Brownie Cameras" shows a Brownie 3-D camera among others. Another month is titled "Kodak Cameras" and shows an early Kodak 3-D camera. The best is the month titled "Stereographs". This shows a selection of 3-D cameras, viewers, and views including a TDC Vivid, Realist slides and viewer, stereo cards, a stereoscope, a wooden viewer for glass slides, and much more.

Priced at \$12.95, *The Photographer's Tools* can be reserved or purchased by phone, fax, mail or in person at the George Eastman House Museum Shop, 900 East Avenue, Rochester, NY 14607, (716) 271-3361 ext. # 303 Fax (716) 271 3970, www.eastman.org.

Rides Go 3-D

The Iwerks® TurboRide® ride simulation theaters in five theme parks will be converted to 3-D projection in 2001 according to Iwerks Entertainment, Inc. The five 148-seat theaters will premier *7th Portal*, a superhero 3-D ride film currently in production at Paramount with Stan Lee Media and Blur Studio.

TurboRide theaters will be converted at Paramount's Great America in California, Kings Island in Ohio, Kings Dominion in Virginia, Carowinds in North Carolina and Canada's Wonderland in Ontario. Each park currently has two TurboRide theaters, and one at each location will be converted to 3-D. More on Iwerks 3-D and Large Format film technology can be found at: www.iwerks.com.

Deep Adventures in Seattle

The history and development of 3-D from stereoscopes and View-Master to 3-D movies and modern technological applications is on exhibit at the Pacific Science Center in Seattle through January, 2001. The exhibit uses a variety of interactive components to demonstrate how our brain can fuse various types of image pairs into stereoscopic images. Following its run at the Pacific Science Center, the exhibit will tour nationally. The Center also has an IMAX 3-D theater with a schedule posted on its web site: www.pacsci.org. Located right next to the Space Needle, PSC Hours are 10 a.m. to 5 p.m. (6 p.m. weekends) every day except Thanksgiving and Christmas.
